4 REQUEST FOR QUOTATION FOR the SANSA Research Portal Wordpress Plugin Development

The SANSA Research Portal (<https://research.sansa.org.za>) is a gateway to share information on SANSA researchers, students and research-related project information. The portal currently exists as a standalone static HTML-based web site.

SANSA requires the Research Portal to be integrated into the main SANSA web presence (<https://www.sansa.org.za>) to share the design aesthetics of the main site, as well as make use of the CMS capability of the WordPress site to allow easy management of the content. The newly integrated functionality will provide SANSA Researchers a platform to share their research and current projects, especially with prospective students and collaborators.

The new functionality must be packaged and developed as a WordPress plugin to ensure the required functionality is implemented as required.

The design of the plugin must meet the requirements of the SANSA Corporate Style Guide and integrate seamlessly into the SANSA web presence.

From a researcher perspective the two main changes will be that researchers will gain CMS access to edit their own profiles and secondly have the added benefit of a blogging space to post content on their latest work.

Therefore, SANSA requires a service provider to re-design the Research Portal with the required added functionality and provide maintenance and support for a 3-year period.

4.2 SCOPE OF WORK (TERMS OF REFERENCE)

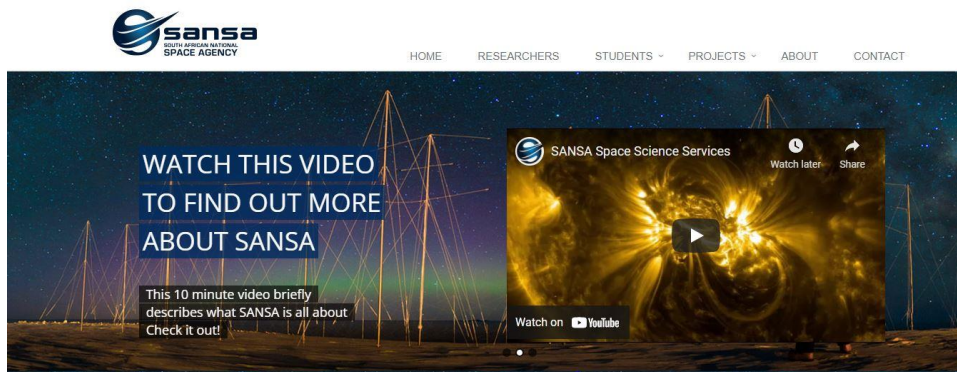

The new Research Portal should be incorporated with the main SANSA WordPress website with the following functionality, but not limited to:

- Portal Frontend Requirements
- Portal Backend Requirements
- Technical Requirements
- Plugin to be developed for Wordpress version \geq 5.8.2
- Roles:
 - Administrator
 - Researcher
 - Student Administrator

The quote should also include the cost of maintenance and support of the plug-in for a three-year period along with an in-person training session with team members in **Hermanus, Western Cape** and a basic user manual.

Front page:

Welcome to SANSO's Research Portal!

The South African National Space Agency (SANSO) contributes to global space research through high-impact collaborative research and development ensuring South Africa is recognised as a leader in space science and technology. SANSO plays a key role in monitoring the near-Earth space environment and forms part of the worldwide network of space weather centres and magnetic observatories. The Agency is responsible for operating a distributed network of research infrastructure used for monitoring the near-Earth space environment over Southern Africa, Indian and Atlantic ocean, and Antarctica.

The research areas covered by SANSO are diverse and are focused under four main Agency programmes: Earth Observation, Space Science, Space Operations and Space Engineering. These focus areas include opportunities in remote sensing, Earth system science, geospatial programming, Antarctic research, climate change, space weather and ionospheric physics, aerospace and electronic engineering, computer science, software and systems engineering.

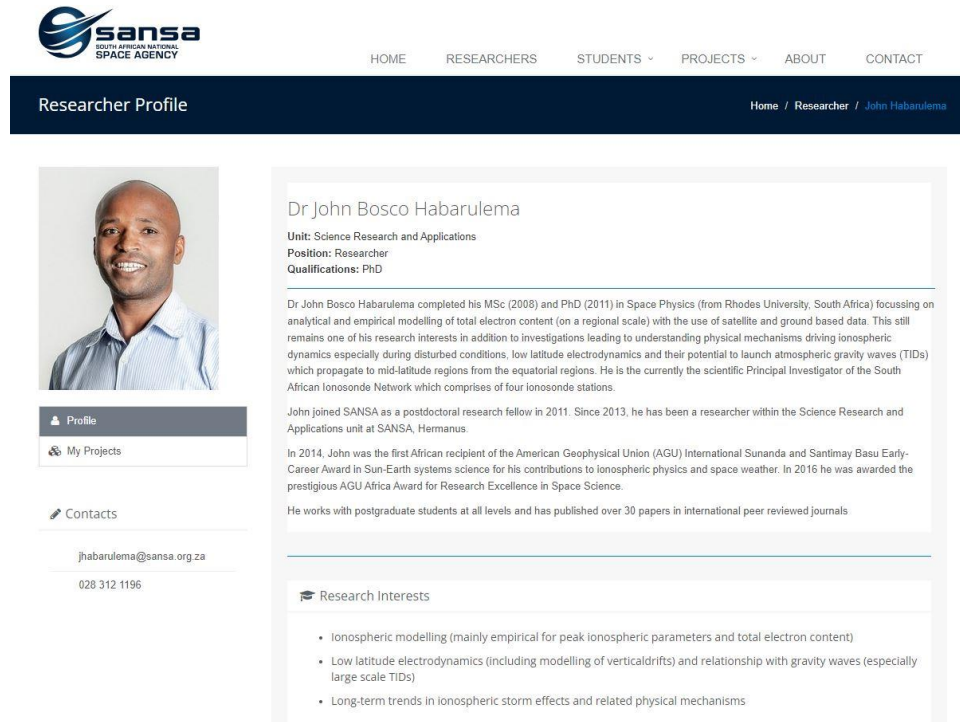

- At the top of the front page, there is a banner rotating a corporate video and two photos with captions. We would like to remove the current content and replace with the latest research news from SANSO. We can draw this content from the website.

- The “Welcome to SANSO” and the “SANSO directories” does not have to migrate to the main website, as this information is already on the main website.
- The only SANSO stakeholder logos that should remain are the DSI, NRF, DFFE , and SANSO
- The menu buttons at the top of the current home page can be limited to home, researchers, students and projects. Contact Us information is currently in the footer and should remain there. These buttons could be listed in the same way the current press centre looks. With the buttons listed at the left of the screen.

Dr John Bosco Habarulema

Unit: Science Research and Applications
Position: Researcher
Qualifications: PhD

Dr John Bosco Habarulema completed his MSc (2008) and PhD (2011) in Space Physics (from Rhodes University, South Africa) focussing on analytical and empirical modelling of total electron content (on a regional scale) with the use of satellite and ground based data. This still remains one of his research interests in addition to investigations leading to understanding physical mechanisms driving ionospheric dynamics especially during disturbed conditions, low latitude electrodynamics and their potential to launch atmospheric gravity waves (TIDs) which propagate to mid-latitude regions from the equatorial regions. He is the currently the scientific Principal Investigator of the South African Ionosonde Network which comprises of four ionosonde stations.

John joined SANSa as a postdoctoral research fellow in 2011. Since 2013, he has been a researcher within the Science Research and Applications unit at SANSa, Hermanus.

In 2014, John was the first African recipient of the American Geophysical Union (AGU) International Sunanda and Santimay Basu Early-Career Award in Sun-Earth systems science for his contributions to ionospheric physics and space weather. In 2016 he was awarded the prestigious AGU Africa Award for Research Excellence in Space Science.

He works with postgraduate students at all levels and has published over 30 papers in international peer reviewed journals

Research Interests

- Ionospheric modelling (mainly empirical for peak ionospheric parameters and total electron content)
- Low latitude electrodynamics (including modelling of vertical drifts) and relationship with gravity waves (especially large scale TIDs)
- Long-term trends in ionospheric storm effects and related physical mechanisms

- The name, photo and bio (with designation, department and qualification) and the research interest need to remain
- Contact details must include email, phone number, link to ORCID profile and link to Research Gate profile and link to (full) publication list (if external).
- Instead of listing publications underneath research interest, we would like to add a blog where Researchers can write a blog and add images about their current work.
- There must be a short menu on the left with the following options: Profile, **Projects**, , **blog**
 - Projects: this should take you to a list of projects. There should be past, ongoing, and new Projects (NB – This should also be linked to the Project page listed on the home page)
 - Blog – all the previous blog posts
- Researchers would need to be able to adjust all these elements, so please create a Researcher role with these permissions.
- Please note that the Researcher role should constrain the Researcher in terms of layout, font etc however allow content to be changed.

EVALUATION CRITERIA

SANSA promotes the concept of “best value” in the award of contracts, as opposed to merely looking for the cheapest price, which does not necessarily provide the best value. Best value incorporates the expertise, experience and technical proposal of the organisation and individuals who will be providing the service and the organisational capacity supporting the project team.

SANSA is committed to achieving Government’s transformation objectives in terms of the Preferential Procurement Policy Framework Act.

The value of this bid is estimated not to exceed R500 000 (all applicable taxes included) and therefore the 80/20 system shall be applicable.

Please Note: the above amount (R500 000) is not the Budget Amount for this Project but is the Treasury threshold for request for quotation (RFQ).

The procedure for the evaluation of responsive tenders is **functionality (quality), price, and preference** method. The evaluation of the bids will be conducted in the following two stages:

- Firstly, the assessment of quality will be done in terms of the evaluation criteria (Table 1) and the minimum threshold of **70 points** explained below. A bid will be disqualified if it fails to meet the minimum threshold for functionality as per the bid invitation
- Thereafter, only the qualifying bids are evaluated in terms of the 80/20 preference points systems, where the **80 points** will be used for price and the 20 points will be awarded to a bidder for attaining the B-BBEE status level of contributor in accordance with the Table below

Preference

(ORIGINAL/CERTIFIED B-BBEE STATUS LEVEL VERIFICATION CERTIFICATE/SWORN AFFIDAVIT MUST BE SUBMITTED IN ORDER TO QUALIFY FOR PREFERENCE POINTS FOR B-BBEE)

Calculation of points for B-BBEE status level contributor

Points will be awarded to a bidder for attaining the B-BBEE status level of contributor in accordance with the Table below

B-BBEE Contributor	Status Level of	Number of points (80/20 system)
1		20
2		18
3		14
4		12

5	8
6	6
7	4
8	2
Non-compliant contributor	0

Quality/Functionality:

Scores will be tabulated to 100 points. Respondents must score **70 points** and over to be assessed on their financial offer and preference score.

The allocation of points for the evaluation of quality/functionality is set out in Table1 below:

Table 1:
